DATA ANALYST

Data Analyst excellent at delivering data-driven insights, analytics, and reporting. Proficient in SQL, Power BI, and Excel for analyzing and building dashboards and reports on business measures to drive impactful business decisions. Skilled in collaborating across business teams to gather requirements and drive impactful results. Strong communicator with a strong focus on enhancing data cleaning, data accuracy, and reporting processes in fast-paced environments.

SKILLS

Microsoft Power BI / Tableau	Excel	Data Visualization	Python
Data Analysis	Google Sheets	Data Collection/Extraction	DAX
Exploratory Data Analysis (EDA)	KPI Dashboards	Data Cleaning	SQL

WORK EXPERIENCE

Content Strategist

IED Edutech

(April 2024 – January 2026)

- Led full website content overhaul for product relaunch, improving clarity and user experience through structured, data-informed content design.
- Boosted customer engagement by 70% through accurate, research-backed content strategy aligned with business objectives.
- Provided comprehensive reporting to senior stakeholders, leading to better digital performance.

Content & Research Analyst/ Data Entry

Freelance

(March 2022 – November 2025)

- Conducted in-depth research and produced 20+ analytical reports, business proposals, and technical documents for clients across different industries.
- Applied data interpretation and strategy skills to deliver measurable results, including a 50% increase in website traffic for clients.
- Managed multiple concurrent projects from inception to delivery, demonstrating strong organizational and time management skills.
- Organized and structured large volumes of raw data into clean, formatted spreadsheets using Excel and Google Sheets for client reporting and analysis.
- Tracked project milestones and delivery metrics using Trello and Notion, managing multiple data entry tasks within tight deadlines.

Geological Research Analyst

Olubaju Onabanjo University - Ago-iwoye, Nigeria

(January 2022 – May 2023)

- Investigated heavy metal concentration in subsurface and lateral depth distribution within a dumpsite in the Dahomey Basin, Owode-Siun, Southwestern Nigeria.
- Collected, prepared, and analyzed soil samples at varying depths using Inductively Coupled Plasma-Atomic Emission Spectrometry (ICP-AES).
- Interpreted multi-variable geochemical datasets, subsurface interpretation and produced 100% evidence-based technical findings and recommendations.
- Demonstrated strong scientific report writing, data interpretation, visualization and independent research skills throughout the project lifecycle.

PROJECT HIGHLIGHTS

E-commerce Dataset - Data Scrubbing, Cleaning and Analysis (SQL)

(April 2026)

- Cleaned and validated e-commerce dataset using PostgreSQL, addressed missing values, duplicates, and formatting inconsistencies.
- Wrote 8 SQL queries analyzing customer acquisition, product performance, seller efficiency, quarterly revenue trends, and payment preferences.
- Delivered analyst memo identifying key operational bottlenecks, provided 2 strategic recommendations projected to improve repeat purchase conversion rates by up to 80% within 90 days. [View on Github](#)

Federal Budget Of Nigeria Dataset - Data Extraction, Cleaning, Analysis and Visualization (Excel, Power BI)

(May 2026)

- Analyzed Nigeria's ₦51.59 trillion 2026 federal budget across 3 sectors (Security, Health, Education), extracted, cleaned, and validated data from official BOF source for 56 MDAs.
- Built interactive Power BI dashboard visualizing budget allocation across expenditure types and 6,000+ projects, enabled sector-level comparison.
- Delivered comprehensive analytical report uncovering critical insights (50% of budget committed to debt/transfers, security receives 2.4x more than education and health combined).
- Documented end-to-end data sourcing decisions, cleaning protocols, reusable datasets and validation checks for government budget analysis. [View on Github](#)
